Made by	Sreeram Kongeseri. Designed and built independently, by one person.
Website	www.tablafocus.com
Press contact	hello@tablafocus.com

Description

Tabla Focus is a tabla practice companion for iPhone and iPad. Lehra, the Taal Metronome, Tanpura, Tabla Tuner and Tabla Math support focused riyaz. Keep your repertoire in bol notation, track pieces from first study to Performance Ready, and save handwritten notes in a private archive.

What it does not do

– It never grades, scores or judges playing.

– No ads.

– It is a companion to a teacher, not a course.

What is different

Most tabla apps give you lehra loops and a metronome. Tabla Focus gives your riyaz a home — for life.

The whole practice, in one place. Most tabla apps are a single accompaniment tool: a lehra player, a tanpura box, a click. Here Lehra, the Taal Metronome, Tanpura and Tabla Tuner sit inside one practice companion, with the repertoire and the record around them.

A repertoire in bol notation. Kaidas, relas, tukras and phrases are written in bol notation on a keyboard made for it, and each piece moves from Study Reserve to Active Study to Performance Ready.

Lehra, with layakari. A traditional melody in raag and taal, with a layakari layer that plays at a ratio to it, plus Graha, Mukda, Cross Taal and Lay Automation.

A private lifetime record. Every riyaz goes into one private record, read back in Practice Progress and gathered into a Lifetime Progress Report. No leaderboards, no rankings, no comparisons.

Rooted in the tradition. Parampara holds the lineage: artists, gharanas and an annotated recording catalogue.
